

PAN AM CLINIC
MINOR INJURY CLINIC PHYSICIANS
PRIMARY CARE PHYSICIANS

The Pan Am Clinic is an innovative, comprehensive musculoskeletal clinic serving Winnipeg and the province of Manitoba. We are a collaborative group of primary care sport medicine physicians, orthopedic surgeons, and physiotherapists treating patients with musculoskeletal disorders and helping them pursue an active lifestyle. Additional services include: X-RAY and MRI, ambulatory surgery, casting/bracing, athletic therapy, nutritional counselling, and pain clinic. We are a progressive clinic offering opportunities in research, education, and technology.

We are seeking motivated physicians to join our team in the MINOR INJURY CLINIC and PRIMARY CARE. Practice is a combination of acute care and follow-up care.

MINOR INJURY CLINIC: serving ambulatory patients with minor injuries (sprains, strains, fractures, minor wounds/burns, and exacerbations of MSK conditions). We work in a collaborative team setting with nursing, healthcare aids, athletic therapists, and casting technologists. We serve the community seven days a week.

PRIMARY CARE/SPORT MEDICINE: serving follow-up patients from the minor injury clinic and providing sport medicine consultation, along with primary care for MSK conditions.

Inquiring physicians should have interest and aptitude in treating musculoskeletal conditions. Experience, training, fellowship, or enhanced skills program in MSK is preferred. CASEM certification is an asset. We work in a fee-for-service model with excellent opportunity for remuneration. Candidates must be eligible for licensure with College of Physicians & Surgeons Manitoba and WRHA staff appointment.
